Photography institute module 1 answers

I'm trying to run a script in Blender that uses multiprocessing Module. According to the documentation the £, Ã © usÃ¡ it possible (see note at the end of "strange errors using a threadingÃ ¢ Module"). Pythons threads allow co-Only-speed currency and wonâ ¢ t is their scripts in multi-processor systems, and modules multiprocess subprocess can be used with the blender and make use of mÃ³ltiplos CPUA s tamba m © £ .. enta the I tried to run script in Blender below: test multiprocessing importaÃ§Ã £ def pool (v): print (v) the pool return the print £ (2) = vp (p.map (test scale (5))) This, PORA © m spawn as many new cases Blender (with separate windows) because hÃ¡ workers p (in my case 2). Tamba © m vomits on the system console: NÃ £ o Ã © possible to read the file "C: \ Program Files \ Blender Foundation \ Blender \ c", do the £ Ã © possible to open the file. nÃ £ o can read the file "C: \ Program Files \ Blender Foundation \ Blender \ of £ multiprocessing.forking importaÃ§Ã the main, main ()", do the £ Ã © possible to open the file. nÃ £ o can read the file "C: \ Program Files \ Blender Foundation \ Blender \ - multiprocessing-fork", do the £ Ã © possible to open the file. nÃ £ o can read the file "C: \ Program Files \ Blender Foundation \ Blender \ 2888", do the £ Ã © possible to open the file. I Tamba © m thought about os.fork use () to do the same thing, but unfortunately Windows on the £ supports it. I've been looking all over the Internet, but now Ata © US in the £ been able to find even minutes © an example proving that the documentation £ estÃ¡ correct. The only thing I found was the line in blenderartists.org, but he estÃ¡ blocked and unanswered. Update: This Ã © a window spesific limitaÃ§Ã £ Module in the multiprocessing. ~ Ideasman42.
